Everything for metalworking under one roof

KNUTH Machine Tools is a leading supplier of conventional and CNC machine tools. KNUTH is a global company with a presence in more than 30 countries.

In an area of 16.000 m² at our headquarters in Wasbek, Germany, we keep a complete selection of machines for all areas of machining and metal working ready for demos and quick delivery.

Open for you 24/7: Take a virtual tour through our warehouses, spare parts warehouses and workshop with Google Street View.

Quality Assurance for your KNUTH Machine

Quality by KNUTH Certified Quality Assurance

More than 1400 machines are shipped annually from our headquarters in Wasbek, Germany. Every machine has to pass a series of tests in our 5-level quality assurance process that covers everything from incoming quality control to alignment testing, and from functional, technical and geometric accuracy tests to the final acceptance test. These tests are conducted by our master technicians who use a dedicated customized data processing system for this purpose.

An ISO 9001 certified quality management system ensures continuous control and improvement of all quality-relevant activities. Design, development and precision of each individual machine are documented exactly in detailed inspection protocols and acceptance test logs.

All-Encompassing KNUTH Service Worldwide Reliability

Trust our global qualified staff take care of everything from installation and maintenance to repairs and upgrades quickly and professionally.

Reliable service from a single source

We provide highly qualified technicians and engineers all over the world to ensure reliable service from one central source. And our global supplier network ensures prompt availability of replacement parts and consumables at a local level.

CONSULTATION

- Sample work pieces
- Machine demos

START-UP

- Installation / Commissioning
- On-site Instruction

TRAINING

- User Training
- Maintenance Training

PREVENTIVE MAINTENANCE

- Inspection
- Maintenance

REPAIR

- Machine Repair
- Spare Parts

MACHINE WARRANTY

- Protect Insurance

SEGMENTED UPPER TOOL

EASY TO USE

VERY LOW MAINTENANCE

SBS E Manual Folding Machines

Models

SBS E 2020/2,0
SBS E 2540/1,5
SBS E 3020/1,2

SBS E Series consists of manual folding machine used for component bending. Due to its compact design, this machine easily fits in small workshops and can be used for small series production.

Main Features

Machine Frame

- The durable solid casted frame construction assures long operating life
- Both sides of the frame columns are covered with steel plates to protect machine moving elements and increase operator's safety

- Setting the required bending angle is easily done with the adjustable angle stop from 0° and up to 135°

- Side positioned handle for easy and firm plate clamping
- The model features a cam lock and rebound spring for bending beam counterbalance to drastically reduce the effort required to operate the machine

- Clamping adjustment is done using the screws situated on internal side of machine feet

Folding Beam

- With a robust folding beam with bow design and transversal supports, any deformations are prevented even after many years of operation
- The screw type manual crowning adjustment on the folding beam increase the precision of bending, especially when working full length

- These models are designed with side screws for easy adjustment of the distance between top and folding beam, according to sheet thickness

Top Beam

- The segmented top beam tools offer a wide range of applications
- SBS E 2020/2,0: 25, 30, 35, 40, 45, 50, 75, 100, 150, 200, 200, 270, 400, 400 mm
- SBS E 2540/1,5: 25, 30, 35, 40, 45, 50, 75, 100, 100, 150, 150, 200, 200, 270, 270, 400, 400 mm
- SBS E 3020/1,2: 25, 30, 35, 40, 45, 50, 75, 100, 100, 150, 200, 200, 200, 270, 400, 400, 400, 400 mm

Technical Data
